

Ref: RAS-1 Company

30<sup>th</sup> March, 2011

To Whom It May Concern:

Developing a good common collaboration with the abovementioned company, we would like to state that our business experience with RAS-1 Company on the building site of AES-3C Maritza East 1 project, Galabovo, Bulgaria, was very good and useful.

RAS-1 organized and performed works on extreme heights such as painting on Unit 1 and Unit 2, including hangers' touch-up activities, adjustment of spring hangers, tightening works on steel structure and cladding. This company has all needed resources for executing the works properly and according the appropriate standards.

We are pleased to recommend this company for any of the abovementioned works on extreme heights.

Sincerely,

Tim Maidenford  
APB Senior Site Manager
